Empathy Map Canvas: Laptop Requestor

What does he THINK AND FEEL? (Internal State)

- **What really counts:** Getting the correct laptop configuration for my job, approved quickly, and delivered fast².
- **Major preoccupations:** Ensuring I select the right accessories and that my manager approves it quickly so my start date isn't delayed³.
- **Worries & Aspirations:** I worry I'll select the wrong specifications or miss a required accessory, which would mean sending the laptop back and waiting longer. I hope the process is simple and I receive a tracking update soon⁴.

What does he HEAR? (External Influences)

- **What friends say:** "The old request form is a nightmare; just email IT directly." "Good luck, it took me three weeks to get my laptop." ⁵
- **What boss say:** "Make sure you follow the standard procedure and get the high-spec model approved by HR first." ⁶
- **What influencers say:** "Our company is committed to digital transformation and using easy self-service tools." ⁷

What does he SEE? (Environment and Context)

- **Environment:** Sees a long, static request form with too many mandatory fields and complex questions⁸.
- **Friends:** Sees colleagues complaining about long wait times and receiving incorrect equipment⁹.
- **What the market offers:** Sees consumer e-commerce sites with dynamic forms, clear photos, and quick checkout processes¹⁰.

What does he SAY AND DO? (Observable Behavior)

- **Attitude in public:** Asks a colleague for help filling out the request form to ensure he doesn't make a mistake¹¹.
- **Appearance:** Looks for a "reset" or "back" button after realizing he made an error but can't find one, so he abandons the form¹².
- **Behavior towards others:** Calls the IT Service Desk to ask which laptop model is correct for his role instead of trusting the form¹³.

Pain (Fears, Frustrations, Obstacles)

- **Fears:** Fear of selecting the wrong laptop or forgetting an essential accessory (e.g., docking station)¹⁴.
- **Frustrations:** The request process takes too long, and there is no clear line-of-sight into the approval or fulfillment status¹⁵.
- **Obstacles:** The static form lacks dynamic fields or validation, making it easy to input incorrect data¹⁶.

Gain (Wants, Needs, Measures of Success)

- **Wants/Needs:** Needs a simple, guided, and dynamic form experience with automated pre-population of their details (Manager, Department)¹⁷.
- **Measures of Success:** Receiving the correct laptop and accessories within **three business days** with minimal manual effort¹⁸.
- **Obstacles (Overcome):** Clear confirmation of submission and automated email updates on the request's progress¹⁹.
